

Rug Doctor Urine Eliminator is designed to remove those nasty stains and odours. The powerful cleaning action is effective against acid-based stains, including vomit and urine.

Urine Eliminator is perfect for pet owners. The formula means you'll never have to worry about carpet or upholstery damage if your furry friend has an unfortunate accident. Urine Eliminator is also the ideal cleaner for households with young children.

Urine Eliminator is also very versatile – it can be used as an effective pre-treatment prior to a Rug Doctor machine cleaning. You can also use Urine Eliminator as a standalone cleaner for a quick emergency solution for any acid-based stains.

Directions of Use

When possible, treat the affected area before the stain dries. Some stains such as urine can produce a bleaching effect on carpets and fabrics.

Apply generously to the stained area. For urine or other penetrating stains, be sure to wet the area thoroughly. Do not dab or blot the treatment area – the enzymes require moisture to clean properly.

Place a damp, colour safe towel over the treated area and let it dry naturally. Where possible, leave the area to remain moist overnight. Highly contaminated areas may require a second application.

Once dry, if discolouration remains, simply dampen with water and blot.

Safety Information

Keep out of the reach of children. Use only as directed, wash hands after use. Avoid contact with eyes.
